360° CYBERSECURITY
FOR THE GLOBAL GAMING INDUSTRY

The global gaming industry is growing fast, and so are cyber threats. Criminal groups, insider risks, and advanced attackers constantly target gaming systems, data, and operations.

BMM Testlabs' BIG Cyber delivers 360-degree cybersecurity protection that helps gaming operators and suppliers stay secure, compliant, and resilient. With more than 40 years of gaming expertise, we understand the industry's unique risks and provide solutions built specifically for gaming environments.

We help protect what matters most

Your players   **Your data**   **Your revenue**   **Your reputation**

-> -> -> -> -> -> OUR IN-HOUSE SECURITY SERVICES <- <- <- <- <- <-

Penetration Testing
We simulate real-world cyberattacks to identify weaknesses before criminals do. Our experts test iGaming platforms, land-based systems, payment environments, and networks and cloud infrastructure, delivering clear reports with practical remediation guidance.

Vulnerability Assessments
We scan your environment to identify known risks, including outdated software, misconfigurations, and exposed services. Issues are prioritized by severity, so you know exactly what to fix first.

PCI:DSS Evaluations
BIG Cyber conducts PCI:DSS gap reviews, readiness checks, and assessments to keep your payment environment secure and compliant. We simplify the process and guide you every step of the way.

Why BIG Cyber?

> Deep gaming expertise <

> Global security team <

> Clear, plain-language reporting <

> Support beyond the test <

Strong defenses require continuous monitoring and rapid response.

BMM Testlabs' BIG Cyber partners with leading cybersecurity platforms to deliver managed services that provide 24/7 protection – without the need for large internal teams.

CYREBRO

24/7 SOC & MDR
(Powered by Google Cloud)

Advanced Managed Detection and Response backed by a global Security Operations Center.

Includes: real-time monitoring, expert investigation, guided response, and faster incident resolution, helping reduce downtime and prevent major breaches.

KnowBe4
Human error. Conquered.

Security Awareness Training

Employees are often the first line of defense. KnowBe4 delivers engaging training, phishing simulations, and reporting tools to reduce human risk.

MAXXSURE

Cyber Risk Scoring & Insights

Maxxsure quantifies your cyber risk with an M-Score™ (0–1,000), showing financial exposure, operational impact, and readiness, supporting better decisions and clearer reporting to executives and regulators.
